

Piloting Social Tenure Domain Model in Uganda for Wider Learning and Dissemination

04 June 2012,
Kampala, Uganda

Long Term Objectives

1. To address the land information requirements
2. To build capacity in the use and application of land information systems
3. Create dialogue between local communities & cities

Outline of Presentation

- Background and objectives
- Enumeration Process
- Initial Results, Challenges and Next Steps

Immediate Objectives

1. To pilot the Social Tenure Domain Model and document the process
2. Identify capacity building requirements around its use for wider learning and application

Pilot Activities

1. Building local partnerships in Uganda and selecting a pilot city
2. Customization of STDM Intermediate version in response to local context
3. Learning, monitoring and documentation - what is needed to build capacity?
4. Drawing lessons for wider application
5. Dissemination

Planning and Consultations

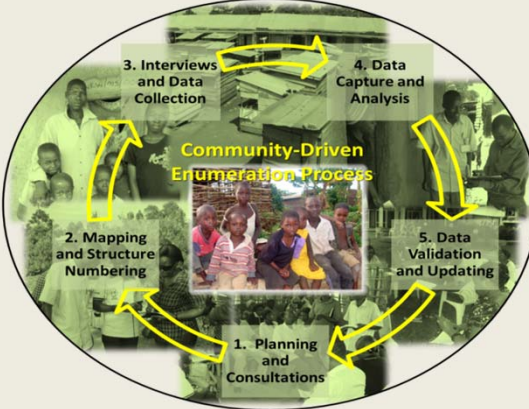

- Planning with stakeholders
- Community awareness, sensitization and mobilization

The Enumeration Process

Planning and consultation

- Preparation of enumeration Questionnaire
- Selection of enumeration teams
- Training of the teams
- Mobilization plan

Mapping and Structure Numbering

- Produce initial maps using satellite imagery or Google Map
- Using the initial map, enumerators number all structures with a unique code
- Map community facilities (e.g. water points, etc.)

UN-HABITAT
FOR A BETTER URBAN FUTURE

Data Capture and Analysis

This stage involves:

- Data entry
- Updating of digital map
- Integrate data on STDM system
- Undertake analysis
- Produce reports and print-outs (as necessary)

UN-HABITAT
FOR A BETTER URBAN FUTURE

Interviews and Data Collection

- Enumeration Teams, usually accompanied by local leaders and municipal officials or elders, conduct house to house interviews and filling the agreed questionnaire.
- Enumerators also collect supporting documents and take photos
- Update initial maps using GPS (e.g. new structures)
- Identify demolished structures

INFORMAL SETTLEMENT ENUMERATION FORM			
Enumeration Details			
Name of Enumerator	Surname: [Handwritten Name]		
Name of Enumeration Area	Other Names: [Handwritten Name]		
Name of Verifier	Surname: [Handwritten Name]		
Verified/Checked (tick)	Other Names: [Handwritten Name]		
Submitted (tick)			
Entered (tick)			
Plot Area Details			
Municipality	[Handwritten Name]		
Name of Settlement	[Handwritten Name]		
Cluster	[Handwritten Name]		
Code	[Handwritten Code]		
Utilities/services accessible/available in the community			
Electricity	1 Yes	2 No	3
Water	1 Yes	2 No	3
Sanitation	1 Yes	2 No	3
Waste disposal area	1 Yes	2 No	3
Market	1 Yes	2 No	3
Health	1 Yes	2 No	3

UN-HABITAT
FOR A BETTER URBAN FUTURE

Data Validation and Updating

- Collected data are displayed and validated by community members; Update the STDM data as appropriate
- Continuous updating and maintenance by community members

Initial Results-Household information

STDM Version 0.9.13 - MKCPP Pilot Project

Household Details

Household Number: NKW/MS/400A

Assigned Char: A

Household Persons

Persons Above 18 Yrs: Male 1, Female 1, Total Persons 3

Persons Below 18 Yrs: Male 0, Female 1, Total Persons 1

Household Tenure status: Tenant

Monthly Household income: 100,000 - 200,000

Rent Per month: [Dropdown]

Daily Transport cost: [Dropdown]

Daily Expenditure: [Dropdown]

Settlement Period: 1-5 years

Previous Residence: In rural area

Reason for settling here: Affordable rent

Financial savings: Not saving

Any Disability in the Household: Number 0

GLTN GLOBAL LAND TOOL NETWORK

UN HABITAT FOR A BETTER URBAN FUTURE

Tenure Information

1. How many are structure owners, tenants and have other tenure status? And where are they?

Legend

- Structure owners
- Tenants
- Relative of owners
- Others
- Mission_boundary
- Mobile Image

GLTN GLOBAL LAND TOOL NETWORK

UN HABITAT FOR A BETTER URBAN FUTURE

At Household Level

How many household are members of saving groups?

Ans. 113 households have joined saving groups

What is the average monthly household income?

Ans. Below 100,000 Uganda Shillings

What is the average daily expenditure?

Ans. Less than 5,000 Uganda Shillings.

What is the daily commuting expenditure?

Ans. Between 1,000-4,000 Uganda Shillings

Key Challenges

1. Need for more time for **planning and sensitization** activities
 - Targeting landowners and local politicians
 - More active participation from local authorities (e.g. during the enumeration process at community levels)
2. Need for more time for **capacity development** initiatives (e.g. enumerators)
3. How to continuously **update and manage** the data at community level?
4. How to **scale up**? What's **next**?

More information

How many are between the age of 7-12 years old?

	Category		Total
	Men	Women	
Gender			
Mission/Bufumbo	102	104	12%
%	10%	6%	6%

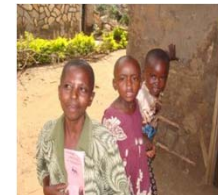

How many are studying?

	Category		Total
	Men	Women	
Gender			
Mission/Bufumbo	84	80	10%
%	8%	3%	4%

Key Lessons

- Project is a good **model for partnerships**
- STDm – from concept to **implementation**; it is **technically sound, has multiple usage and simple to use**
- Combination of pro-poor land tools (STDm, participatory enumeration) is **doable, effective and useful**
- **Ownership of the process and organizational capacity** of the community are important
- **Capacity development** is a catalyst for sustainability; experience opens up scaling up **opportunities**
- Pro-poor solutions have **huge potential** to impact on the lives of the poor

Next Steps

1. Continue information validation, **sharing** and updating
2. Pursue identified community projects (e.g. lighting, water, road)
3. Pursue initiatives for 'citizens' recognition' (e.g. address system, occupancy permits, tenure security)
4. June 2012 presentation to Cities Alliance Meeting
5. July 2012 – Training cum Learning Workshop
6. Networking Event – World Urban Forum
7. Continued capacity development and technical assistance

Addressing the Land Information Requirements of the Urban Poor

Piloting STDM in Uganda for Wider Learning and Application

THANK YOU !
